CORE COMPETENCIES

- Full Stack Dev
- Frontend Dev
- Backend Dev
- REST APIs
- React.js
- Next.js
- Node.js
- Express.js
- PHP
- Laravel
- WordPress
- Shopify
- SEO
- Hosting
- Domain Mgmt
- cPanel / DNS
- Website Security
- Malware Removal
- Performance Opt.
- Deployment
- Project Ownership
- Client Comms
- Bug Fixing
- AI-assisted Dev

TECHNICAL SKILLS

Frontend
HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind CSS, Framer Motion, GSAP, Three.js, Swiper, Recharts

Backend
Node.js, Express.js, PHP, Laravel, REST APIs, MVC, CRUD, Authentication & Authorization

Databases & CMS
MongoDB, MySQL, Firebase, WordPress, Shopify

Hosting & DevOps

SOFT SKILLS

- Communication
- Leadership
- Teamwork
- Problem Solving
- Time Mgmt
- Critical Thinking
- Quick Learner
- Ownership
- Adaptability

KEY ACHIEVEMENTS

- 20+ live projects delivered end-to-end
- Proven production support experience
- Multi-platform development expertise
- Strong hosting & domain management skills
- Trusted client communication track record
- Website security & malware removal specialist
- Fast, reliable bug resolution
- Modern, polished UI development

PROFESSIONAL SUMMARY

Senior Full Stack Developer with hands-on expertise across the MERN stack, Next.js, PHP/Laravel, and MySQL/Firebase, building scalable, secure, and high-performance web applications from concept to production. Skilled in WordPress and Shopify development, SEO optimization, and full-lifecycle deployment, including domain management, hosting, cPanel and server configuration, website security, malware removal, and hack prevention. Recognized for strong project ownership, fast and effective problem-solving, clear client communication, and consistent performance optimization across 20+ live production projects. Motivated by solving real business problems through clean, modern interfaces and robust backend architecture.

ABOUT ME

Passionate and results-driven Full Stack Developer based in Himachal Pradesh, India, with a focus on building reliable, secure, and business-ready web applications. Comfortable owning a project across its full lifecycle — from architecture and development through deployment, hosting, security hardening, and post-launch support — while communicating clearly with clients and cross-functional teams throughout.

Outside of work: listening to music, coding personal projects, travelling, playing badminton, and continuous learning.

WORK EXPERIENCE

Senior Full Stack Developer — ITx SentialDec 2025 – Present

Mohali, India

- Lead full stack development across React, Next.js, Node.js, PHP, and Laravel, delivering scalable applications backed by MongoDB and MySQL.
- Own website deployment, domain management, and hosting for client projects, including server configuration and 24×7 production monitoring.
- Deliver technical support and rapid bug fixing while maintaining direct client communication throughout the project lifecycle.
- Manage website security, malware removal, and hack prevention alongside ongoing performance optimization and SEO.
- Analyze business requirements and brand needs to propose and implement effective technical solutions, collaborating closely with cross-functional teams.
- Build and maintain WordPress and Shopify sites in parallel with custom full stack applications.

Full Stack Web Developer — Innojs Infotech Pvt LtdDec 2024 – Dec 2025

- Delivered 20+ live client projects using React, Next.js, Laravel, and PHP with RESTful API integrations.
- Built and maintained WordPress websites, handling hosting setup, SEO optimization, and database design.
- Managed end-to-end deployment for client projects, ensuring smooth handoff and post-launch stability.

Full Stack Development Intern — Unified MentorInternship

Remote · ISO Certified Program

- Implemented authentication flows and protected routes for secure application access.
- Integrated third-party APIs to build responsive, fully functional web applications.

KEY RESPONSIBILITIES

- Client handling & technical support
- Production monitoring & bug fixing
- End-to-end website development
- Deployment, hosting & security
- SEO & performance optimization
- Website migration
- Database management
- Cross-functional collaboration

FEATURED PROJECTS

Weather Application

Real-time weather forecast app built with React.js, featuring a clean, responsive interface.

current-weather-pr.netlify.app

Netcoder Technology Website

Institutional website built to showcase courses, programs, and student outcomes.

netcoder-v.netlify.app

Architecture Website — LA Zone

WordPress website for a Dubai-based architecture firm, built for performance and SEO.

lazone.ae

Studio Inside Out

Portfolio-style website for a design studio, focused on clean visual presentation.

studioinsideout.co.in

Space Race Architects

Custom-built website for an architecture practice, emphasizing brand-driven layout and speed.

spaceracearchs.com

Website Audit Tool

Internal tool for monitoring, performance analysis, and SEO auditing across client sites.

Internal Tool

ADDITIONAL EXPERTISE

Beyond core development, regularly manages the full technical operations layer for client websites — domain registration and DNS configuration, hosting setup across GoDaddy, Namecheap, Bluehost, and Hostinger, cPanel/hPanel administration, SSL and server-level security, and ongoing malware detection and removal. Applies AI-assisted development workflows (Claude, Claude Code, ChatGPT, Gemini) to accelerate delivery without compromising code quality, and stays current with modern frontend tooling such as Framer Motion, GSAP, and Three.js to build polished, high-performing interfaces.
